EXPERIENCE

Meetups App (source code)

A vue.js app that enables you to create meetups
In your area, you could also add the meetup to a list and shows it since it pulls the meetup's data from the firebase's database.

Furniture Store App (source code)

A vanilla JavaScript app with no library, it pulls in product's data from the json file and displays them, it also enables you to add your desired product to the cart and remove it.

Expense Tracker App (source code)

A JavaScript app that allows you to calculate how much expenses you pay

Manage Customers App (source code)

A vue.js app that enables you to add customer's contact information and display
their information that you added by pulling their data from the firebase's database.

EDUCATION

Republic High School – Niğde, Turkey
Diploma, 2017
